COVID Policy Update

As we begin school tomorrow, our COVID policy will include recommendations made by the CDC. Any student or employee who tests positive for COVID may return to school after five days if he or she has no symptoms and has been fever-free for 24 hours. This person must wear a mask for 10 days after testing positive. This includes the five days the person has been out. An employee or student who has come in direct contact with someone who tested positive must wear a mask for five days from the time of the contact. Masks are recommended for all students and employees.
