

					K.MD	MEASUREMENT AND DATA								
						<i>Describe and compare measurable attributes.</i>								
					K.MD.1	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object.								
					K.MD.2	Directly compare two objects with a measurable attribute in common, to see which object has “more of”/“less of” the attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter.								
						<i>Classify objects and count the number of objects in each category.</i>								
					K.MD.3	Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.								
					K.G	GEOMETRY								
						<i>Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres).</i>								
					K.G.1	Describe objects in the environment using names of shapes, and describe the relative positions of these objects using terms such as above, below, beside, in front of, behind, and next to.								
					K.G.2	Correctly name shapes regardless of their orientations or overall size.								
					K.G.3	Identify shapes as two-dimensional (lying in a plane, “flat”) or three dimensional (“solid”).								
						<i>Analyze, compare, create, and compose shapes.</i>								
					K.G.4	Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).
